the European Union**

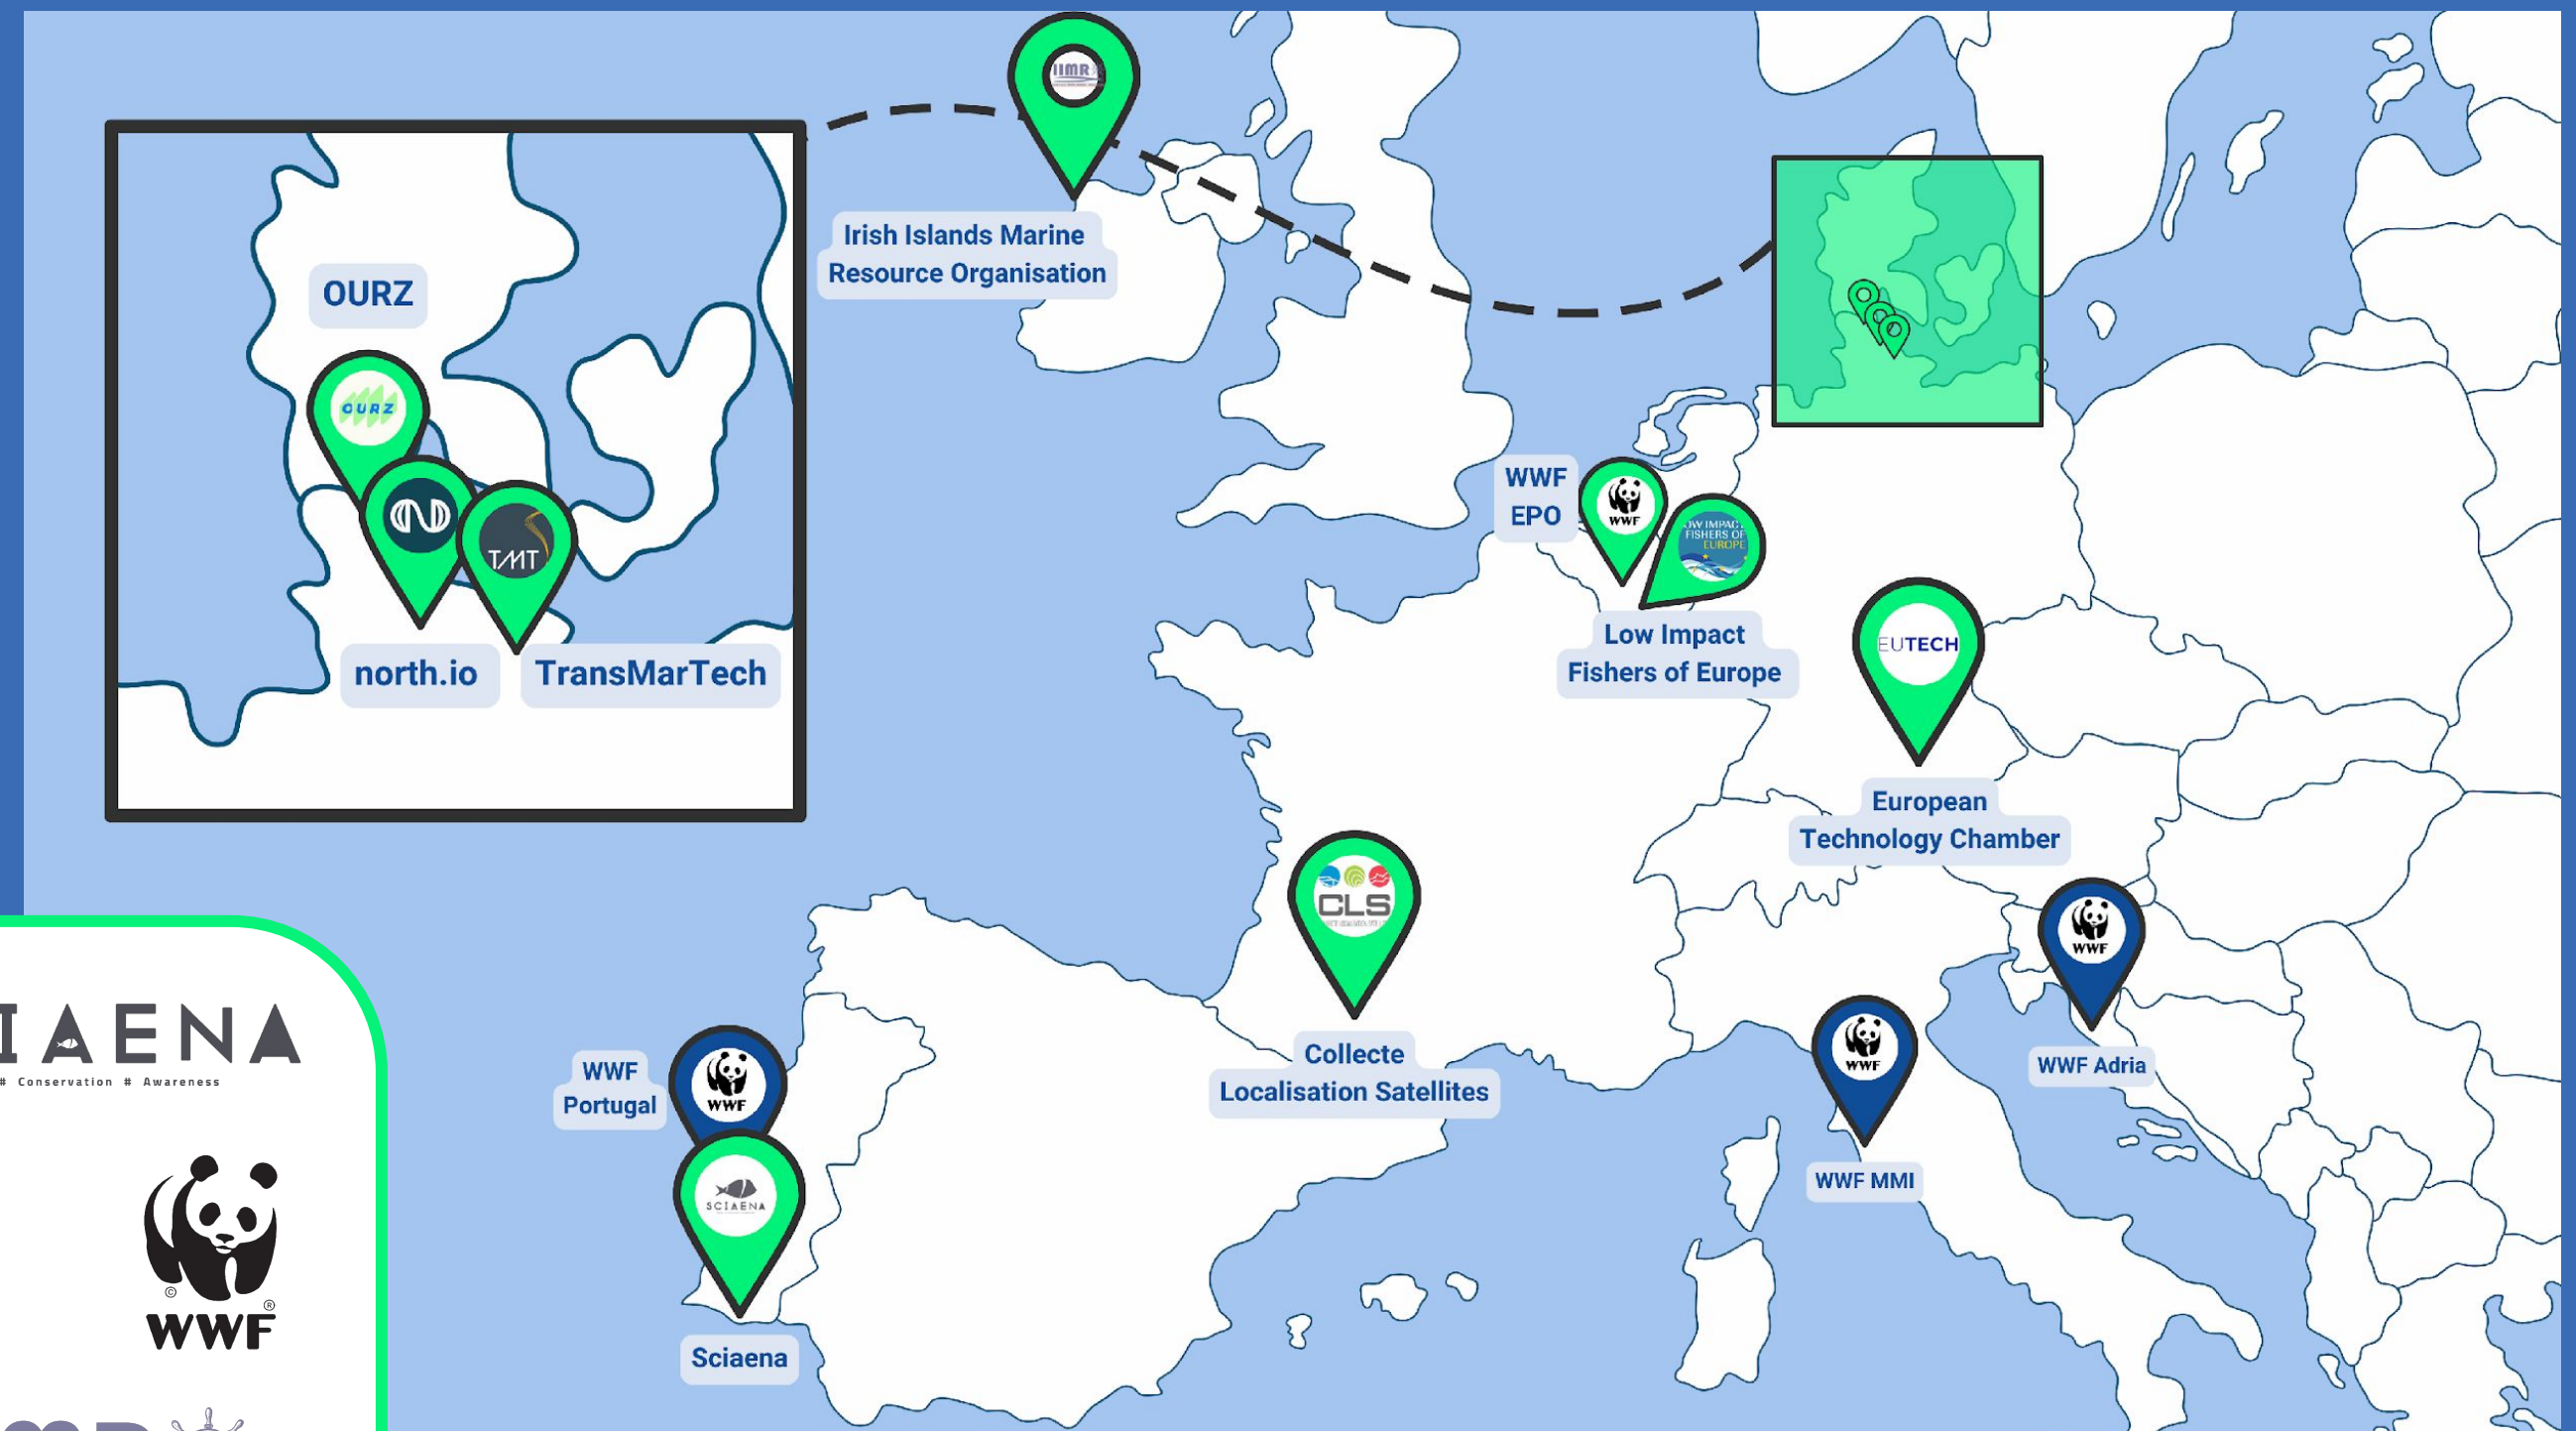

Fish-X At A Glance

**June 2022 – May 2025
(36 months)**

**€6 Million
EU-Funding: €4.5 Million**

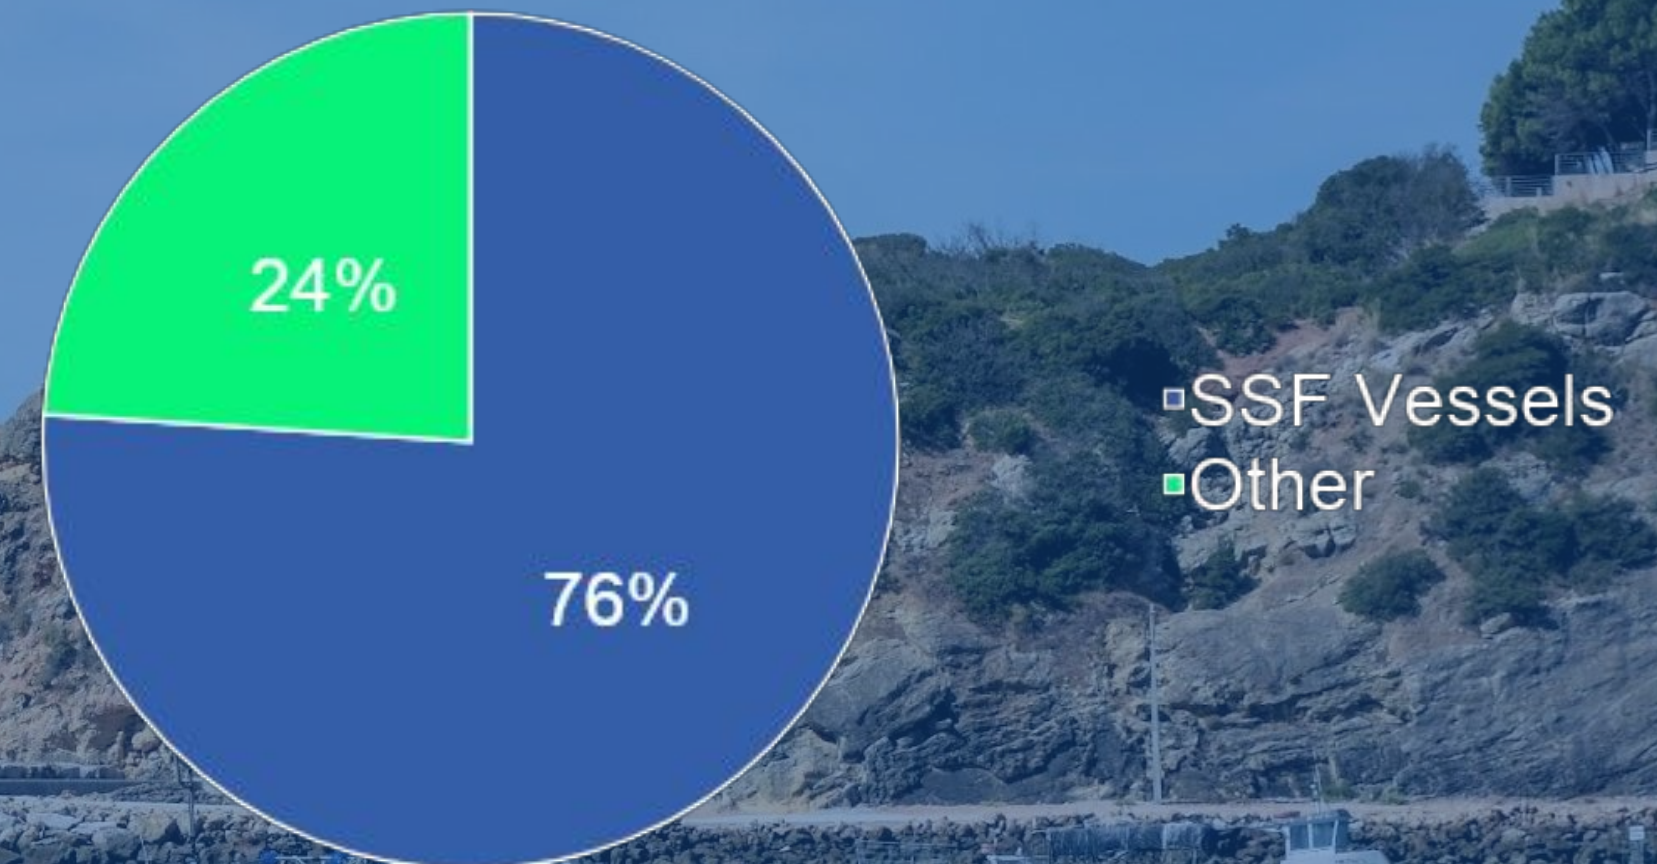

**Co-funded by
the European Union**

Economic & Legislative Context

- Small-Scale Fisheries (SSF) crucial part of coastal economies and cultures, but remain underrepresented
- Competitiveness Compass (01/2025): push for competitiveness & simplification
- Oceans Pact: providing strong momentum to sustain SSF sector
- Revised EU Fisheries Control Regulation 2023/2842: Changes for SSF
 - ❑ Tracking devices for all SSF vessels by 2030
 - ❑ Electronic logbook for all SSF vessels by 2028

Active EU Fisheries Vessels

Fish-X Results After 3 Years

3 Technological Tools

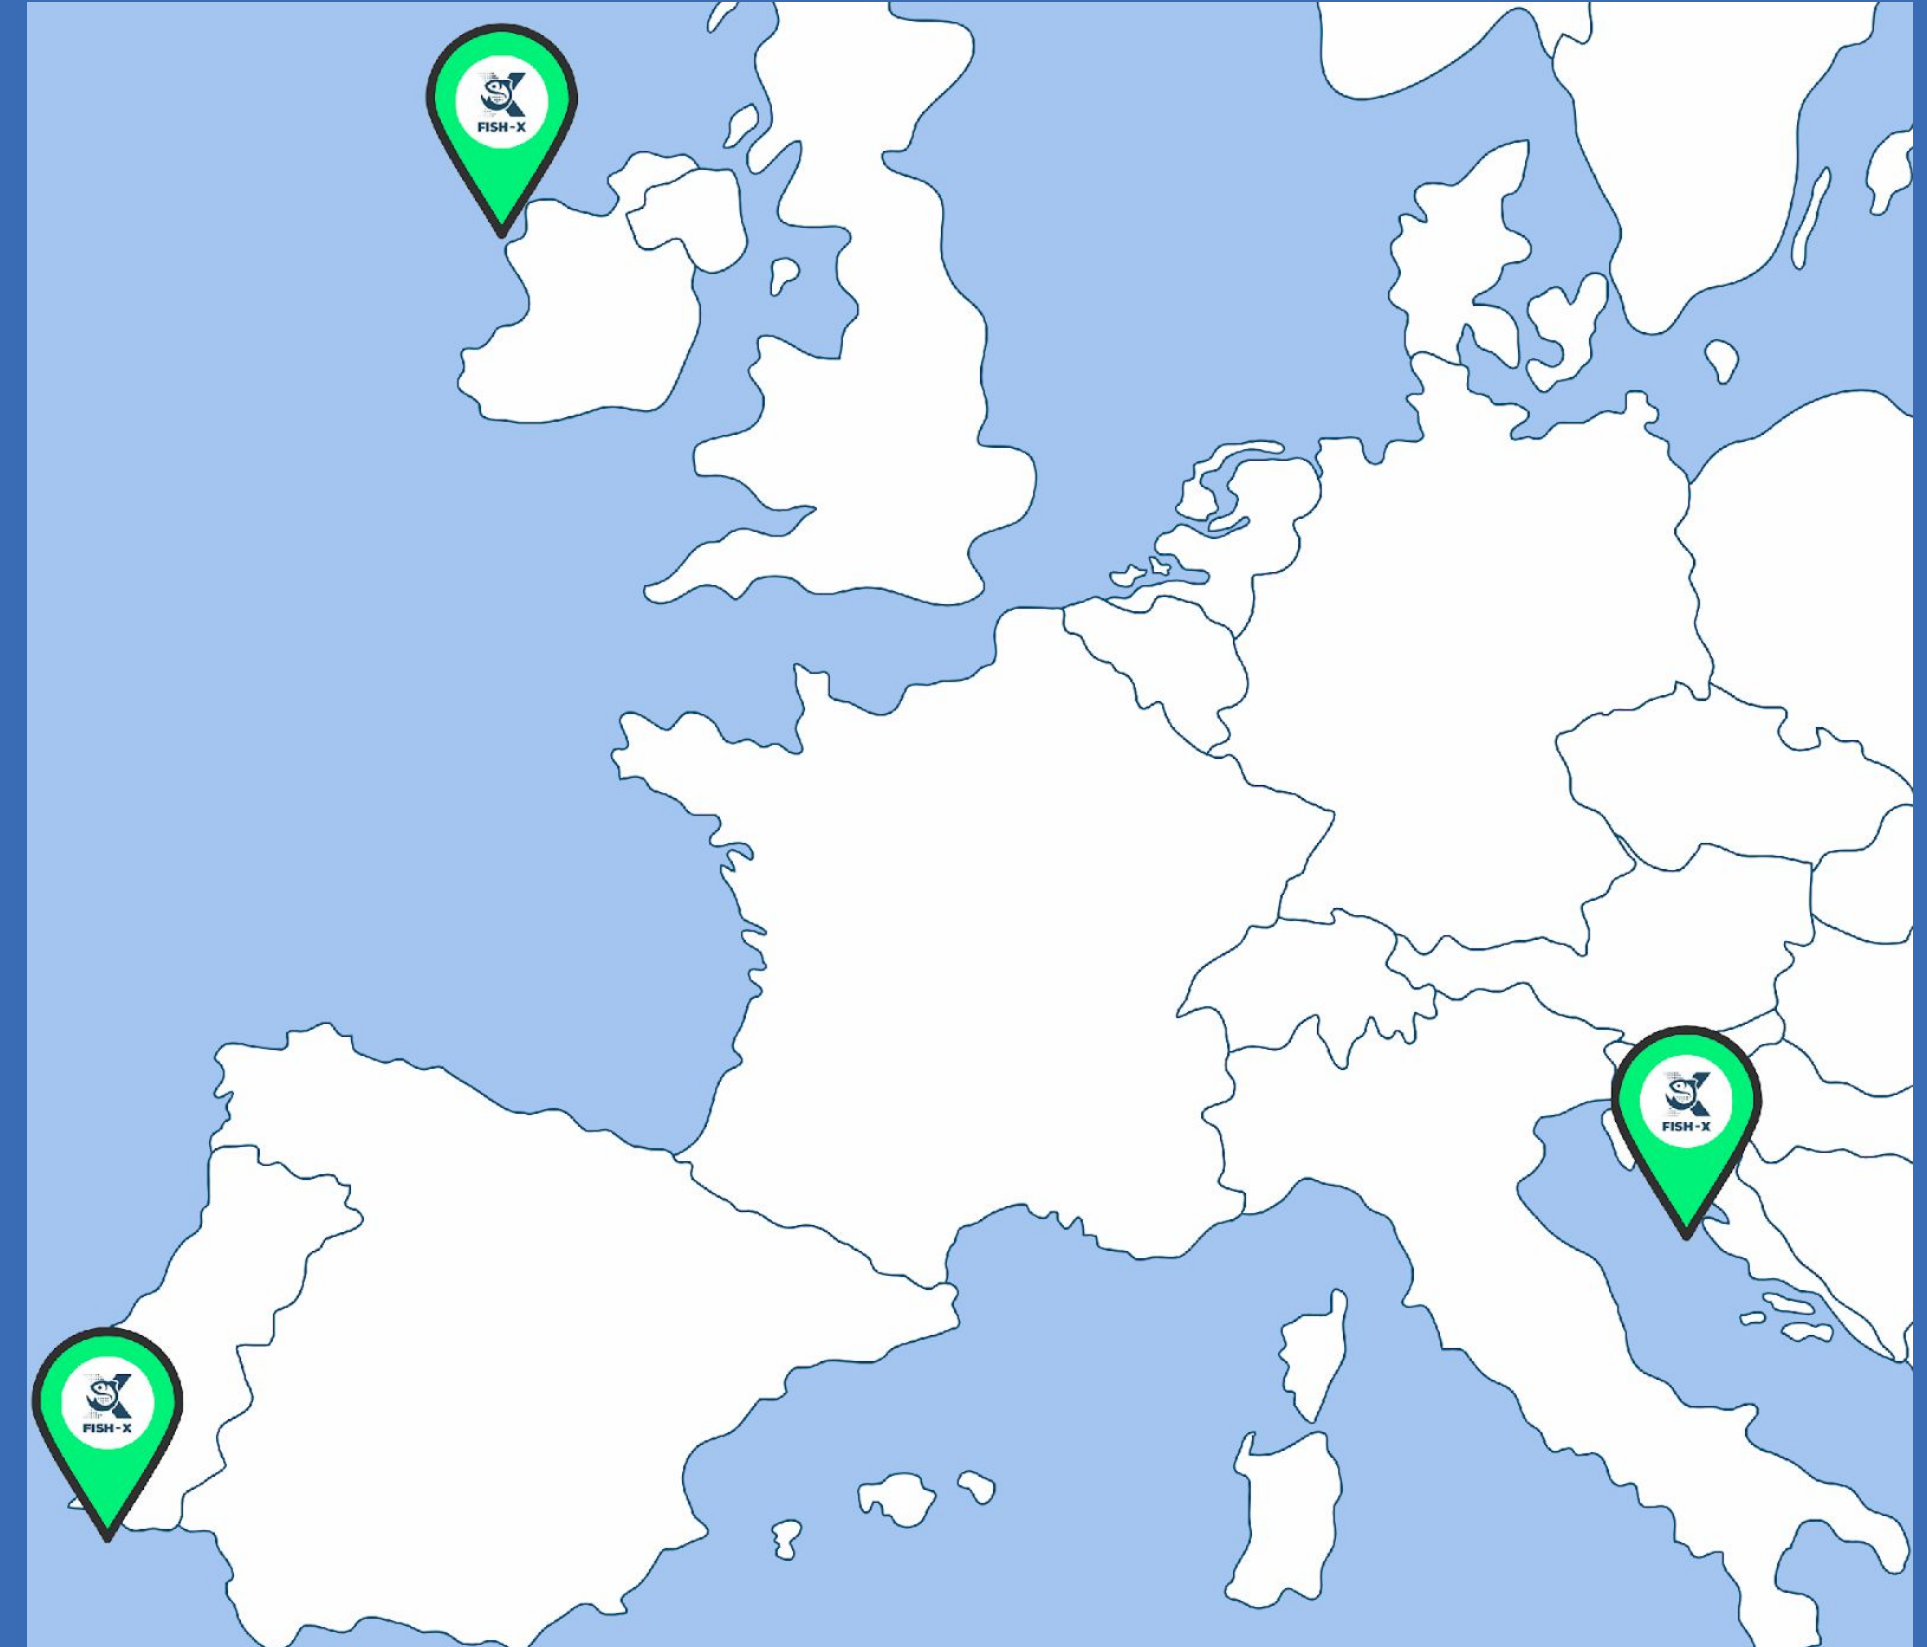

Development of 3 technological outputs to

- collect, anonymise and analyse VMS and catch reporting data,
- publicly display fisheries activities on maps, and
- to ensure transparent seafood traceability

3 Locations

Pilot project to install vessel monitoring system (VMS) devices and electronic fishing gear marking devices (e-gear markers) with fisher's communities

Co-funded by
the European Union

Fish-X Use Cases & Stakeholder Engagement

3 Locations

Ireland, Portugal & Croatia

Installations

104 Vessel Monitoring System devices (NEMO)

11 Electronic Fishing Gear Markers (NAOS)

the European Union

Fish-X Use Cases & Stakeholder Engagement

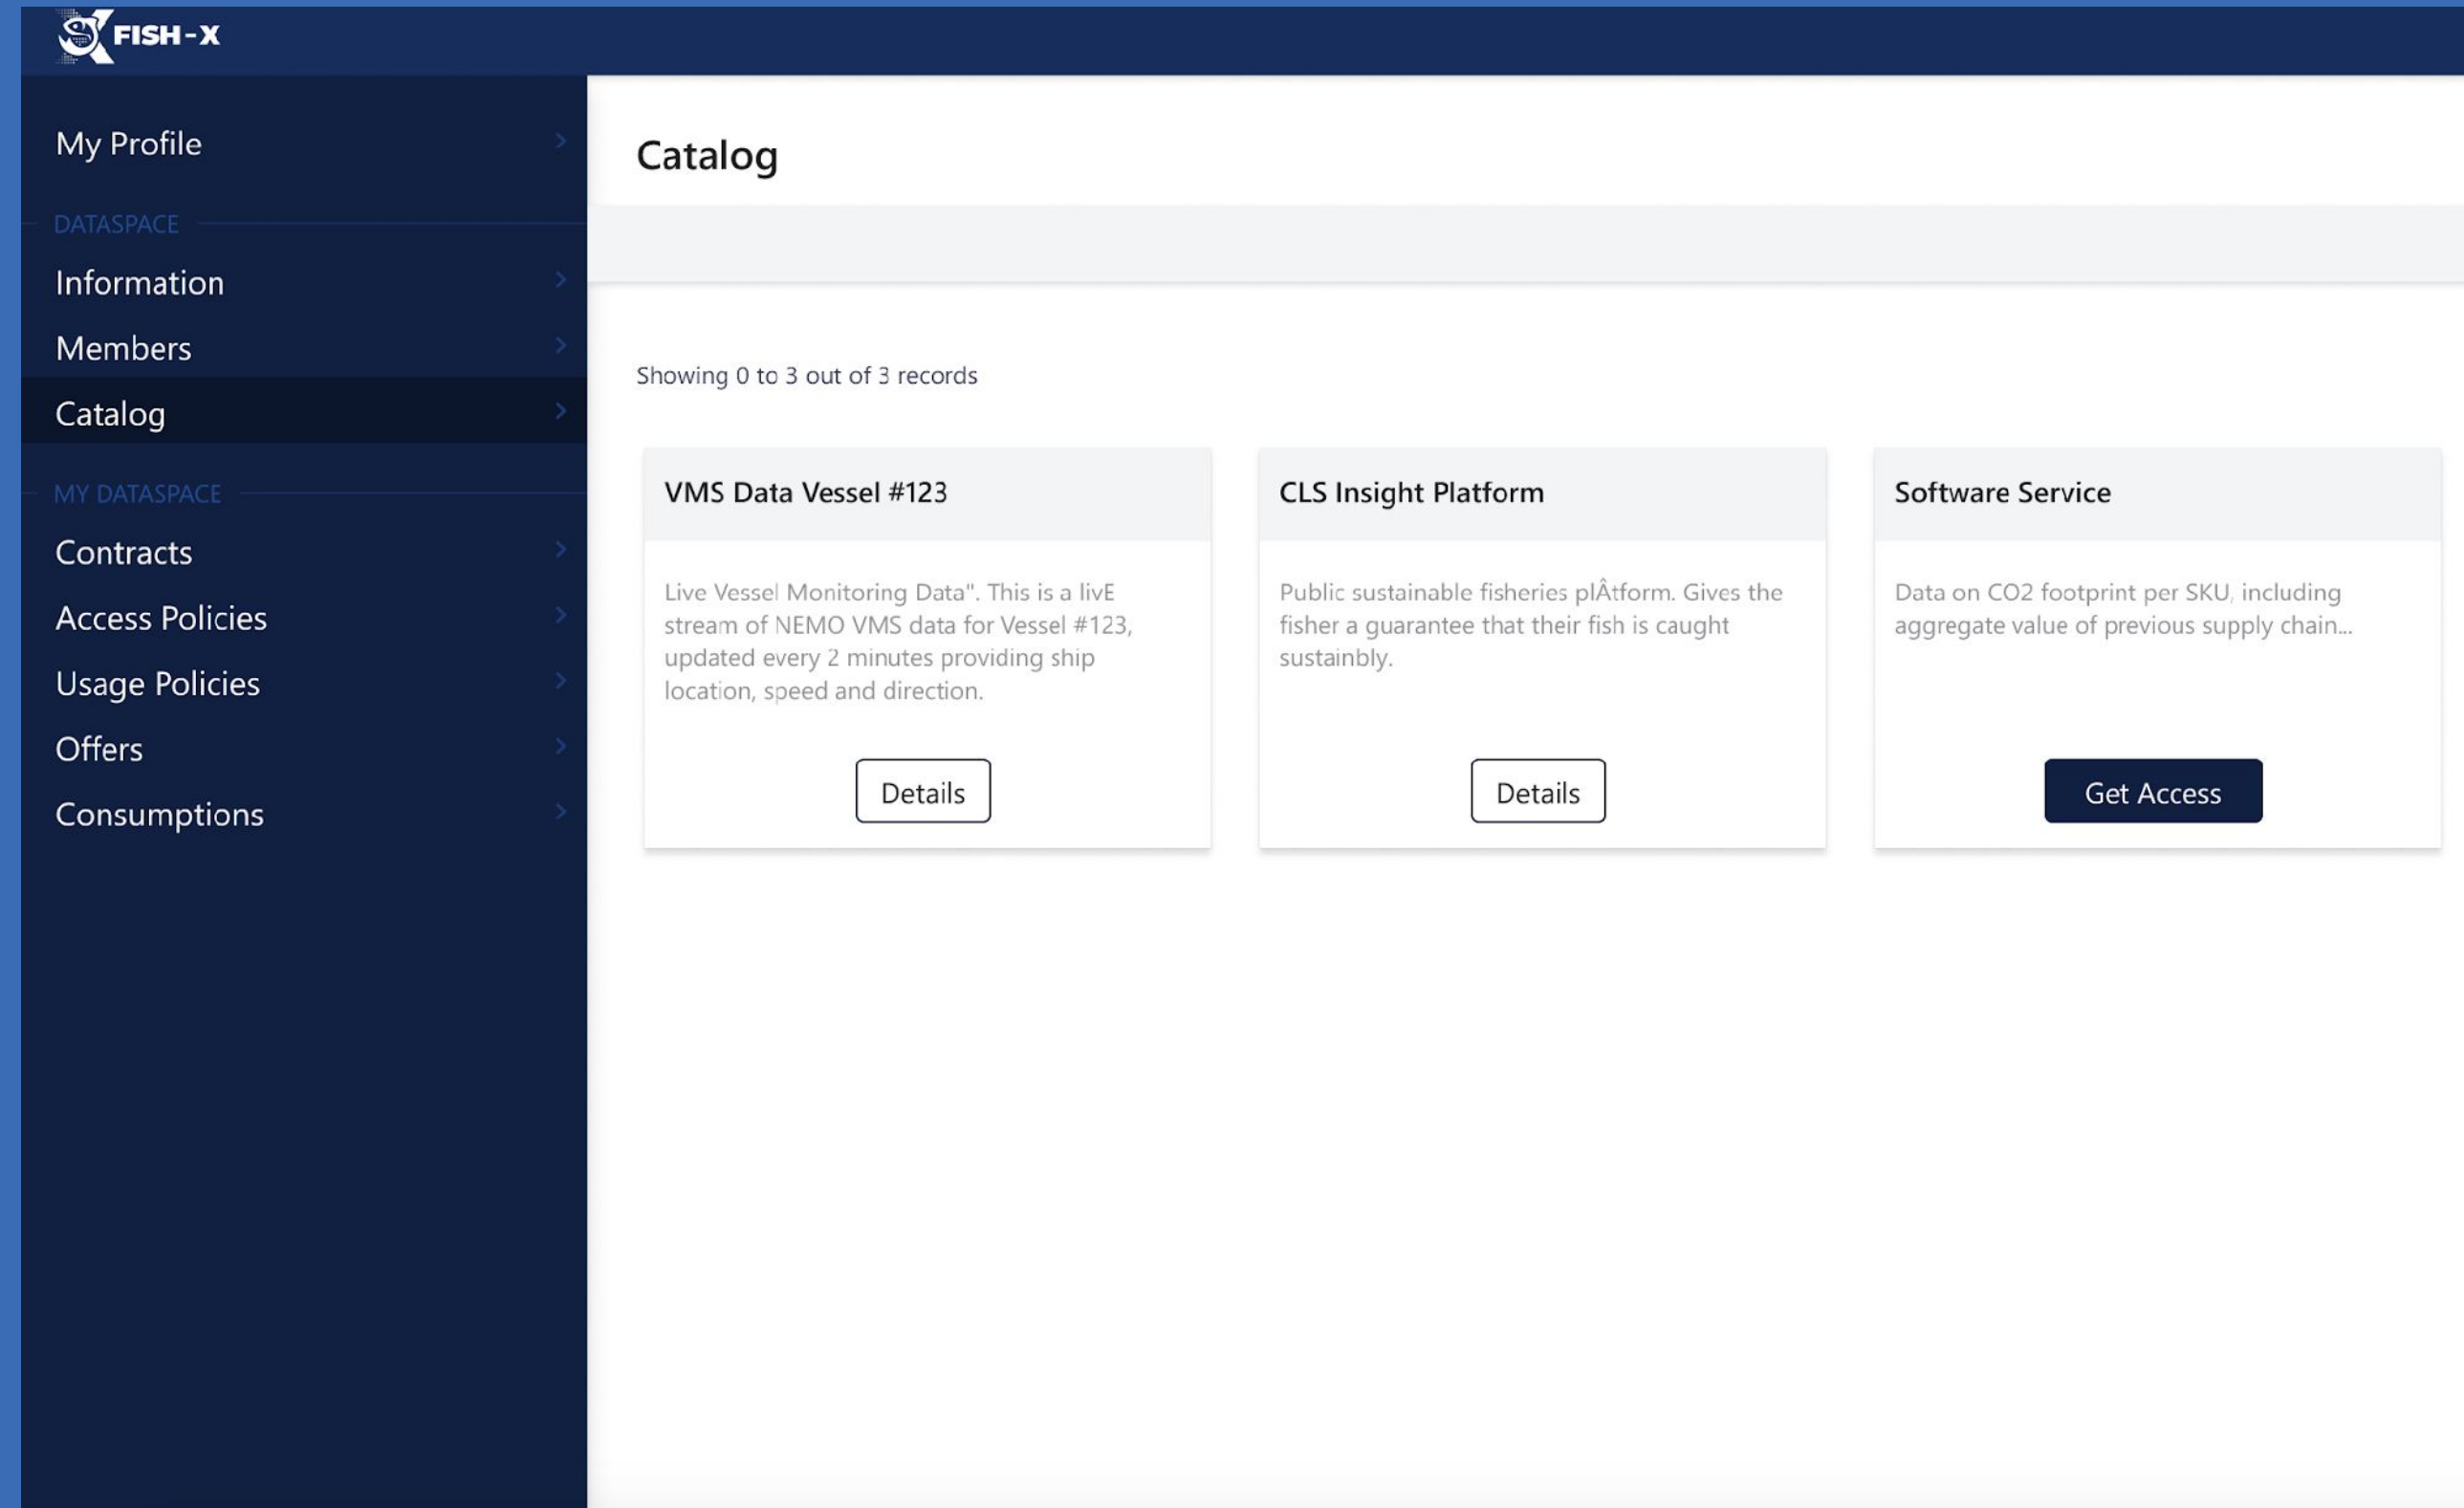

Fish-X Data Space

- Sharing of fisheries data among relevant stakeholders
- In line with EU data space principles & revised control regulation
- Supporting better decision-making

Technological Readiness Level (TRL) 6/7: demonstrating (sub-)system prototypes in relevant environments

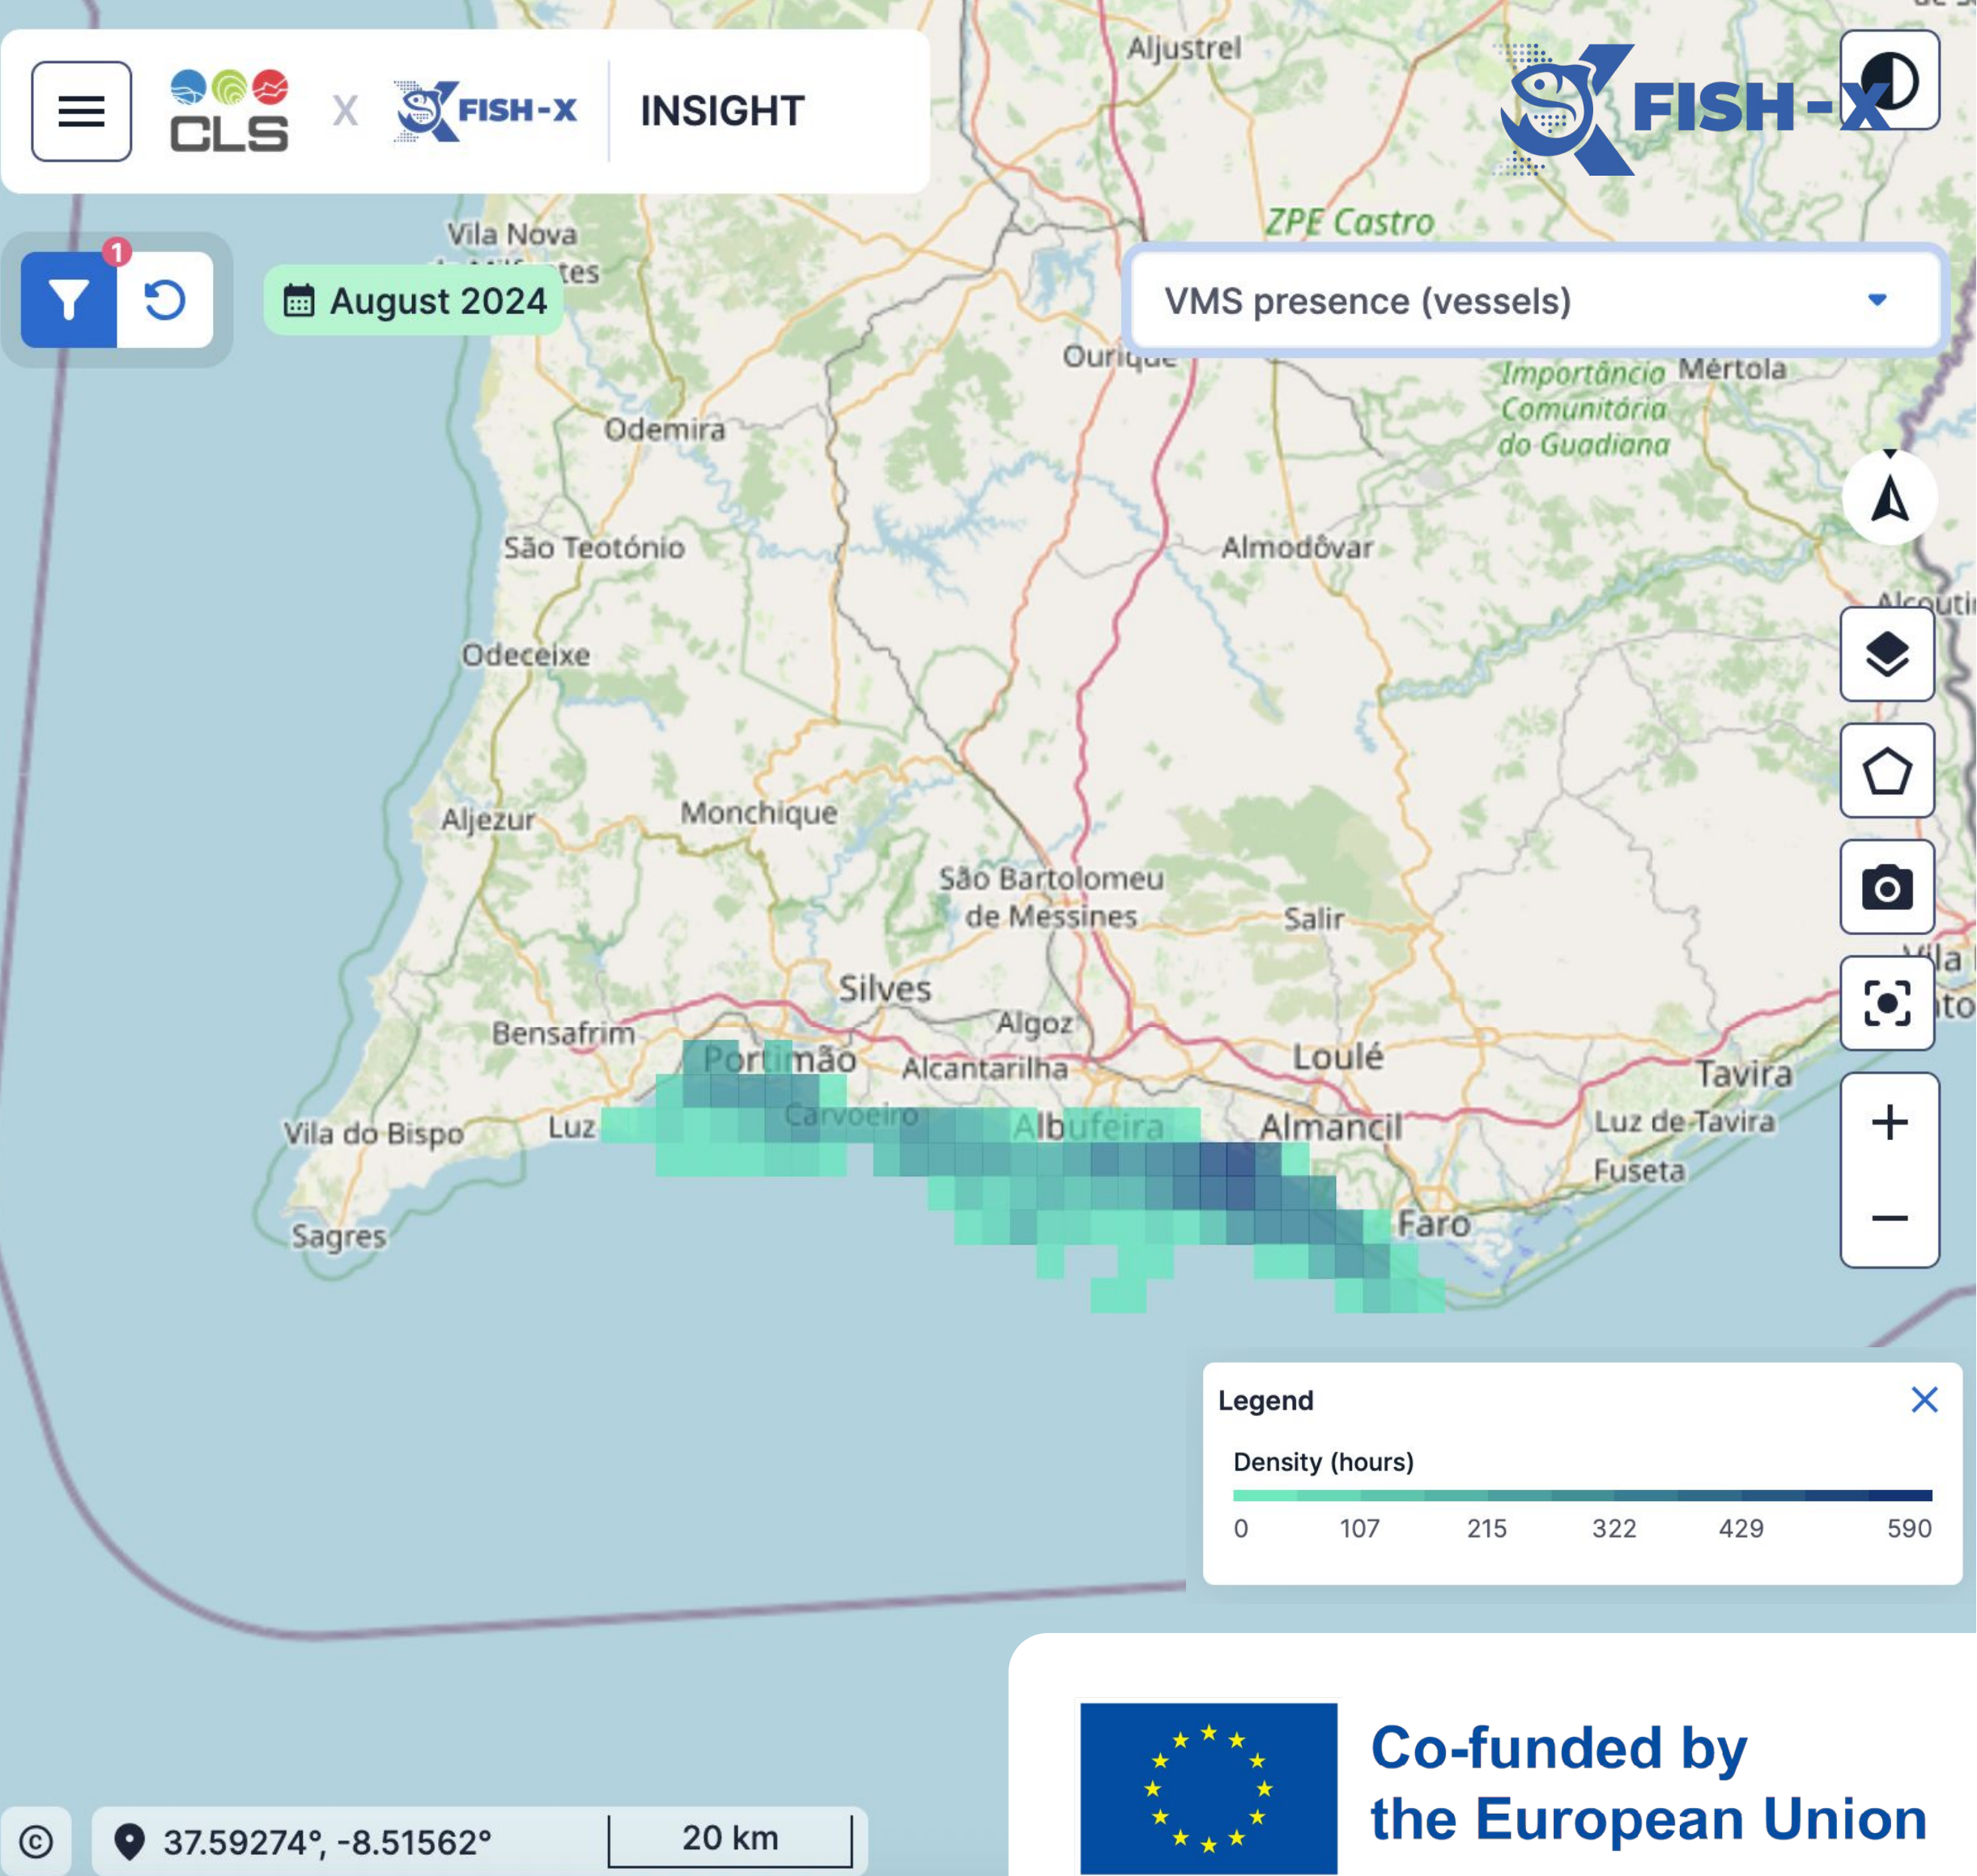

Fish-X Digital Tools

Insight Platform

- Vessel Presence

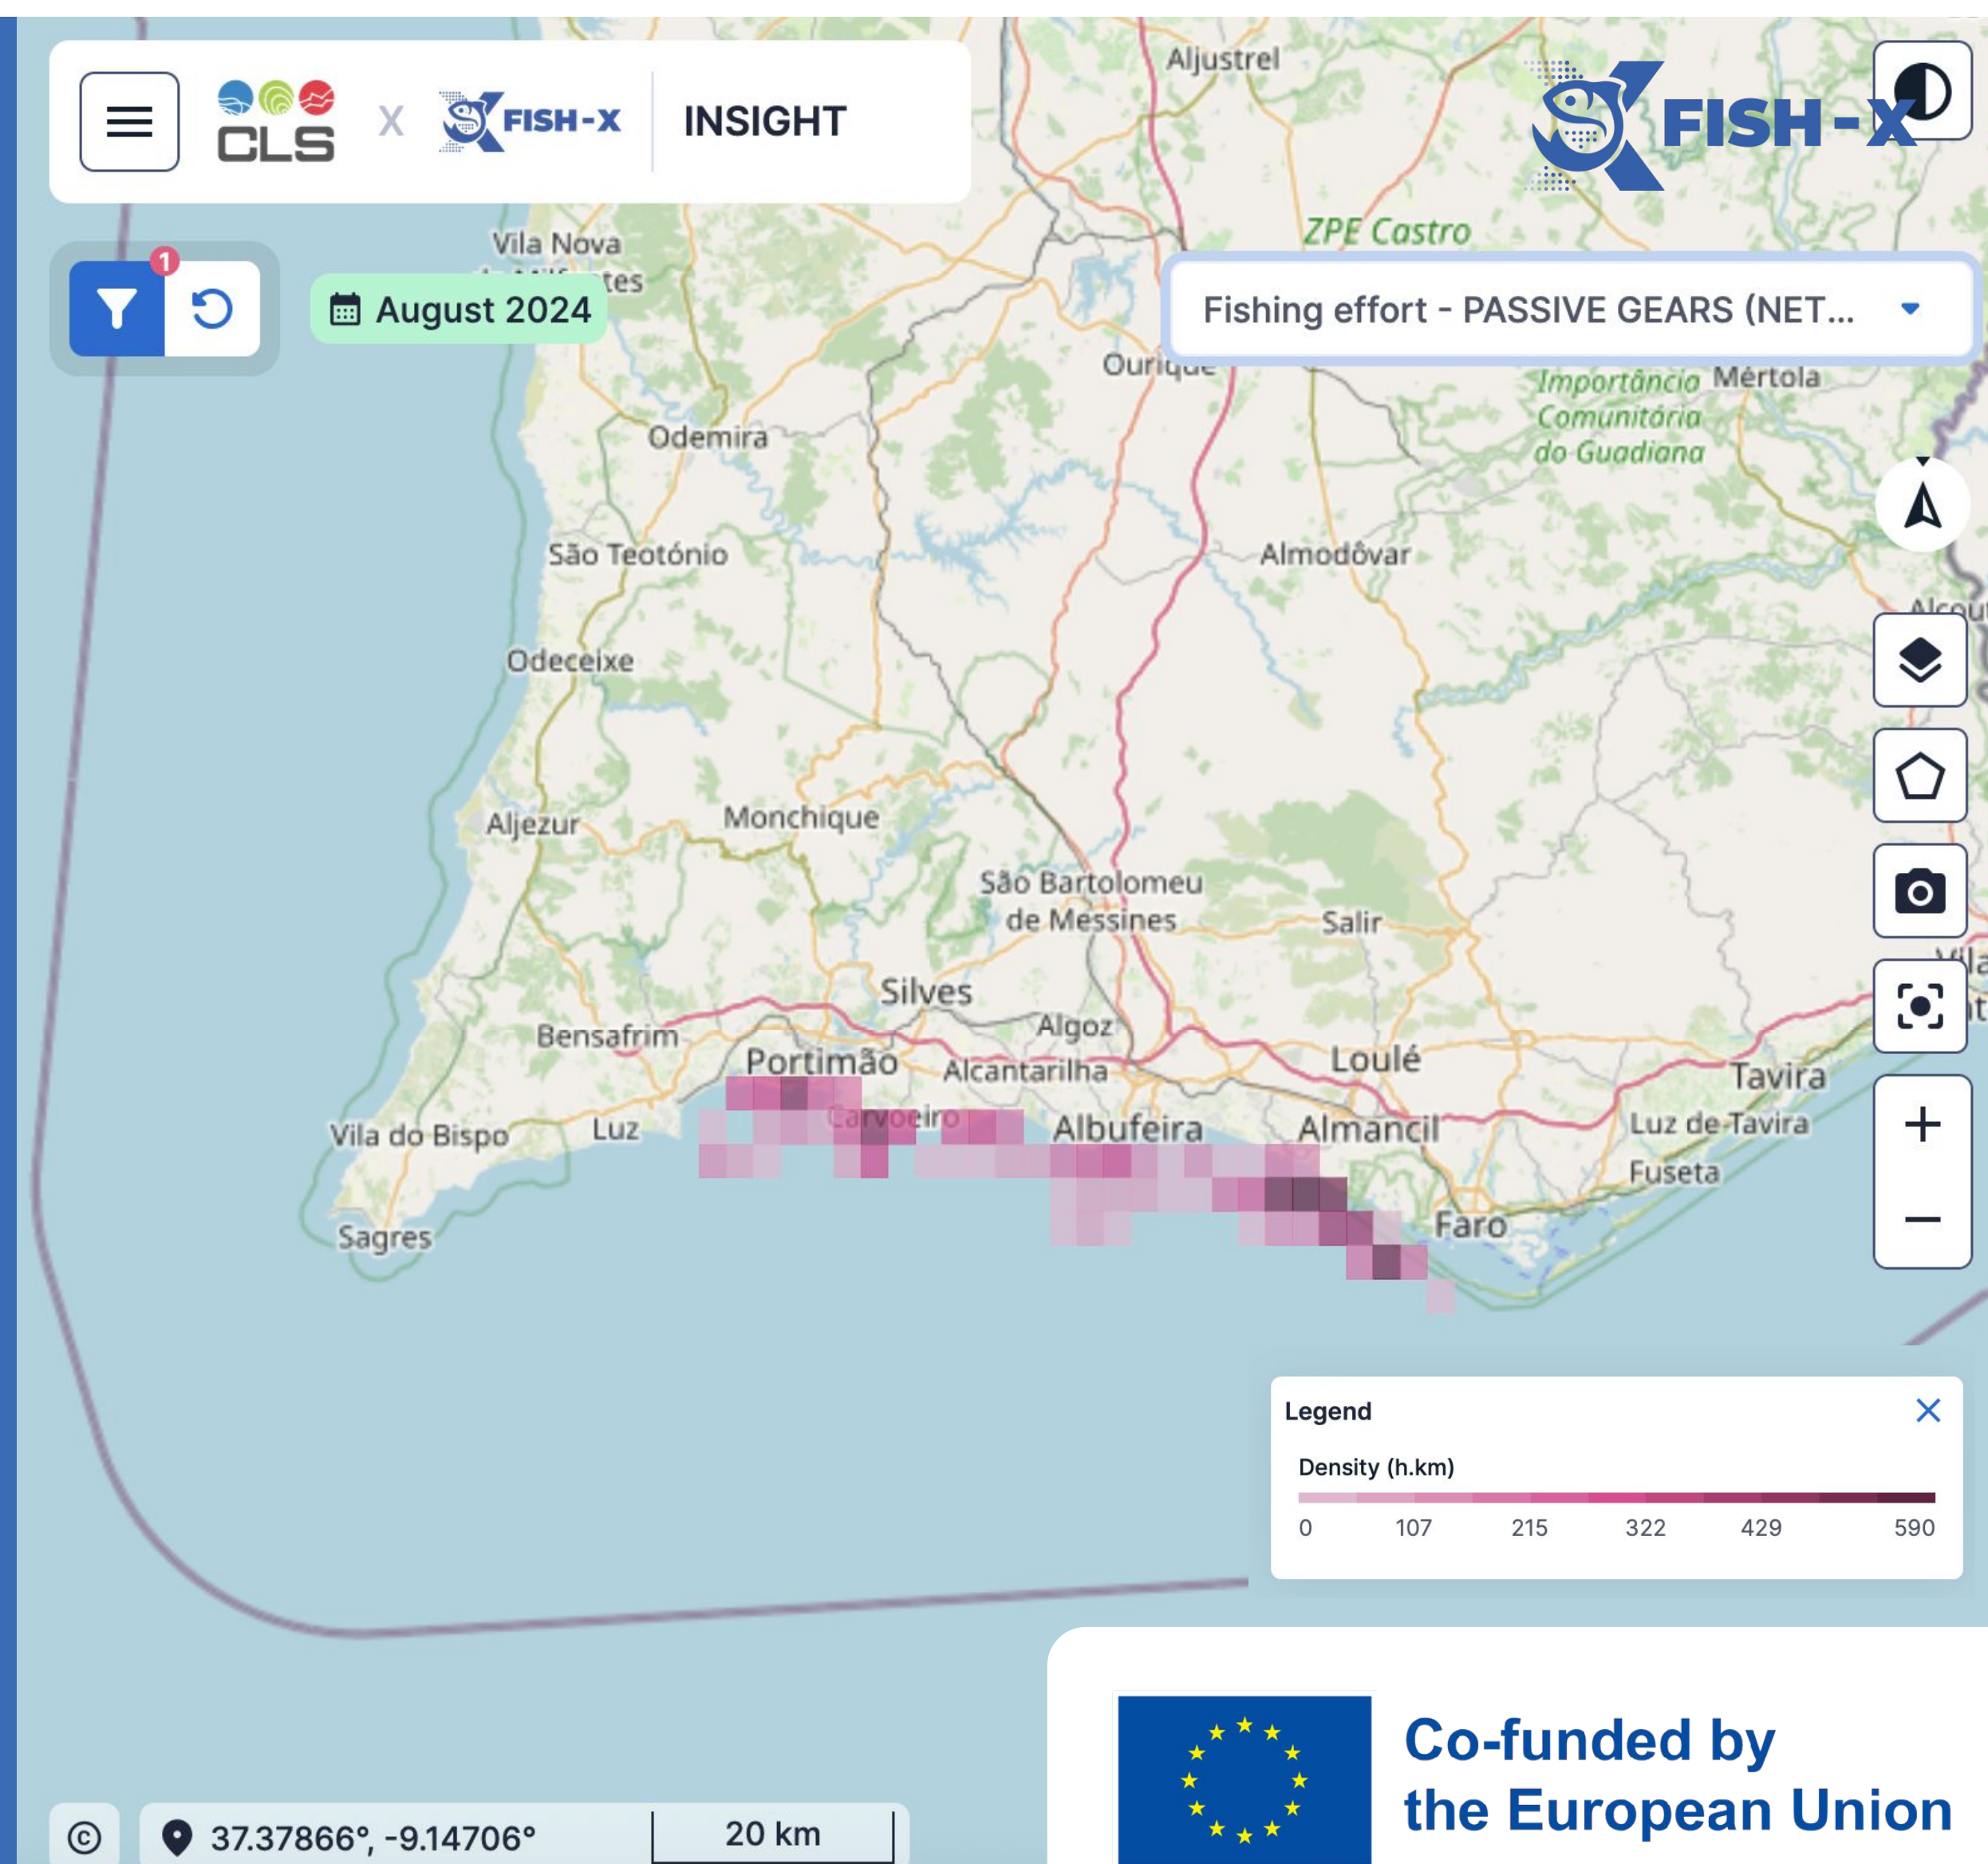

Co-funded by
the European Union

Fish-X Digital Tools

Insight Platform

- Fishing effort derived from VMS trajectories by AI & machine learning

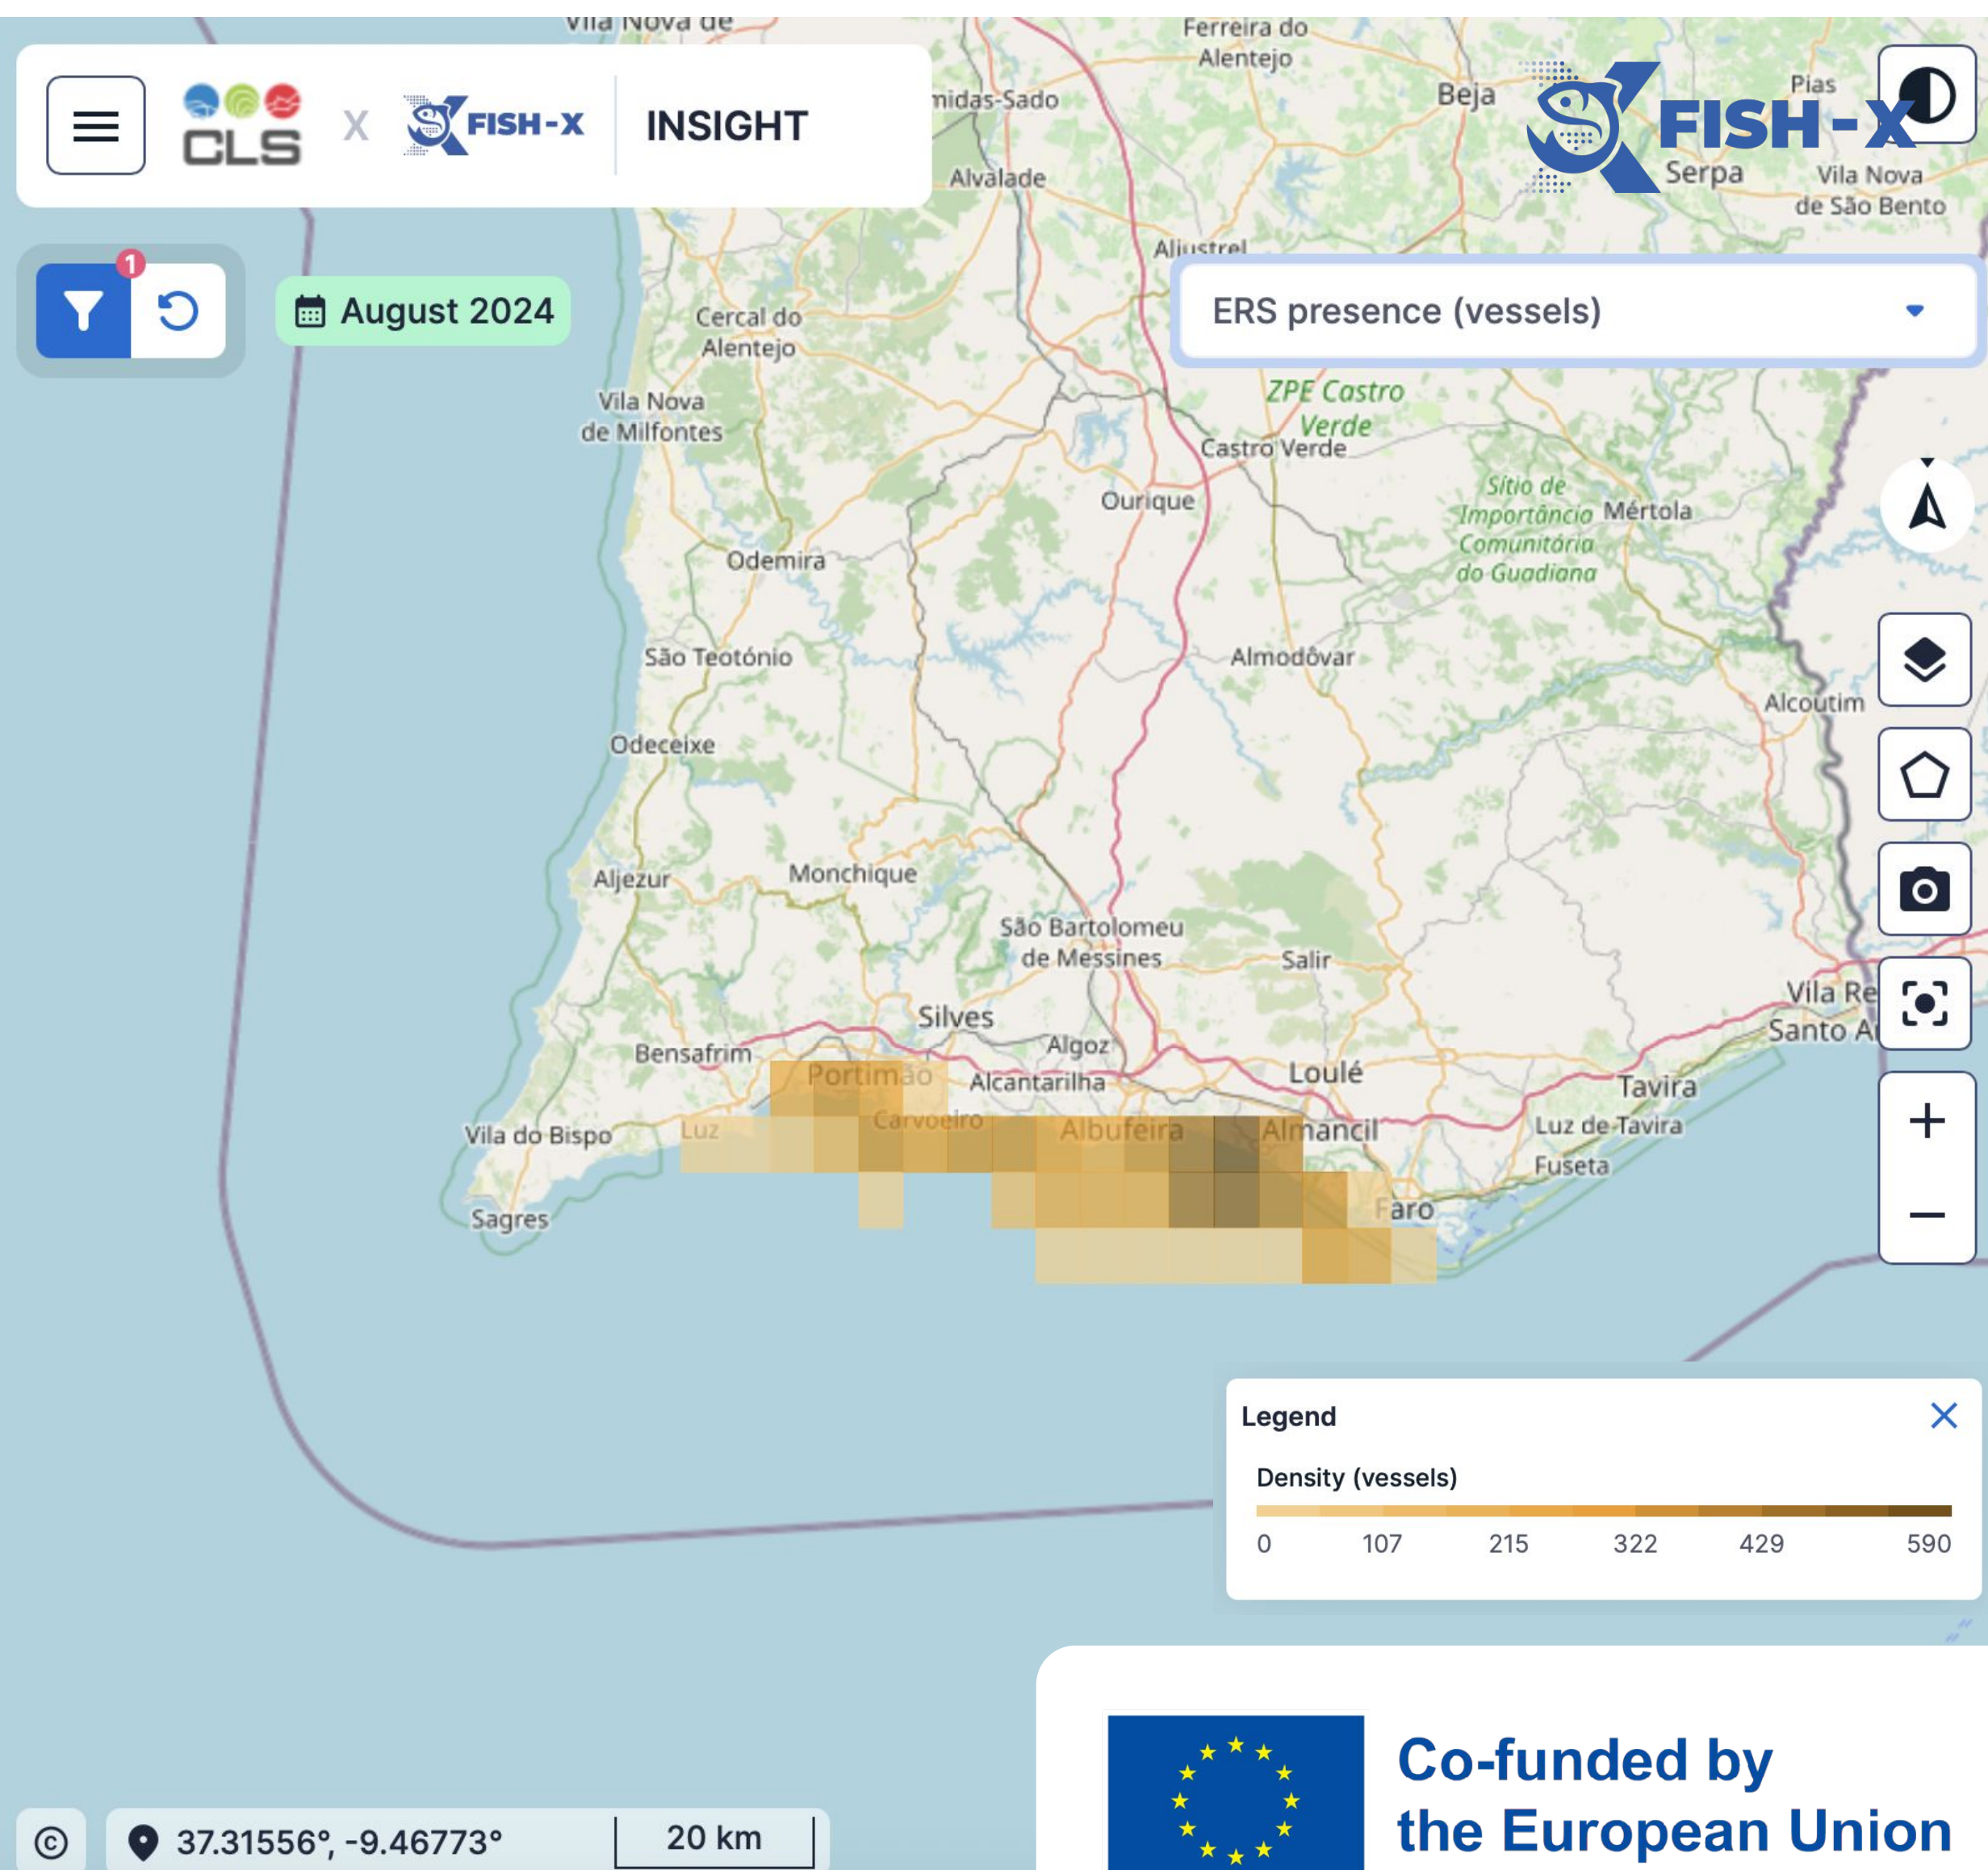

Fish-X Digital Tools

Insight Platform

- Electronic Logbooks Reports & statistics

TRL 7: system prototype demonstration in operational environment

Co-funded by
the European Union

Fish-X Digital Tools

Traceability Platform + App

- Transparent & comprehensive mapping of seafood products
- Using blockchain technology
- App enables consumers receiving information on supply chain

TRL 5: Technology validated in relevant environment

The screenshot displays the Fish-X Traceability Platform interface. On the left is a sidebar menu with categories: MARKETS (Dashboard, Campaigns), COMPLIANCE (Traceability, Assessments, Mitigations, Reports), ECOSYSTEM (Brands, Products, Commodities, Suppliers), COLLABORATION (Groups, Notifications, Tasks), and SETTINGS (Account). The main content area shows an 'Overview' page for a product named 'Baked Fish' by Fish-X Fish, with Article Number 1. Below this are several informational cards: 'Labels' showing 'Marine-Ste...' and 'Alaska-Res...', 'Category' showing 'Meat and fish' and 'Frozen meals', 'Scores' for Eco (B), Nova (--), Nutri (C), and CO2 (--), 'Allergens & Traces' showing no listed allergens or traces, and 'Nutritional Spectrum' with values: Energy 306.0 kcal, Fat 17.6 g, Carbs 21.2 g, and Protein 15.1 g. The bottom of the interface shows a user greeting 'Hi, Jana' and a 'Logout' link. The European Union flag and 'Co-funded by the European Union' text are visible in the bottom right corner.

3 Main Lessons Learned

1. **Collaboration across sectors** is key
2. **Demonstration of benefits** for SSF is crucial to:
 - Simplify work
 - Prove fishing grounds
4. **Need of robust stakeholder engagement**
 - Trust & capacity building

Photo: Joana Jesus

3 Main Lessons Learned

1. Collaboration across sectors is key

2. Demonstration of benefits for SSF is crucial to:

- Simplify work
- Prove fishing grounds

4. Need of robust stakeholder engagement

- Trust & capacity building

Photo: Ankith Kumar

What's Next?

- Maintain Fish-X technological tools operational
- Policy Recommendations
- Inspired by Fish-X: EMFAF Proposal: Future for Young Fishers
 - Lessons > long-term transformation
 - Continuation to support pilot projects & communication effort
 - Progress on analysis of vessel trajectories

Digitalisation isn't optional

– it's essential for fairness and sustainability for the fishing sector, coastal communities and for the environment.

Document 32023R2842

   Share

Regulation (EU) 2023/2842 of the European Parliament and of the Council of 22 November 2023 amending Council Regulation (EC) No 1224/2009, and amending Council Regulations (EC) No 1967/2006 and (EC) No 1005/2008 and Regulations (EU) 2016/1139, (EU) 2017/2403 and (EU) 2019/473 of the European Parliament and of the Council as regards fisheries control

PE/38/2023/REV/1

OJ L, 2023/2842, 20.12.2023, ELI: <http://data.europa.eu/eli/reg/2023/2842/oj> (BG, ES, CS, DA, DE, ET, EL, EN, FR, GA, HR, IT, LV, LT, HU, MT, NL, PL, PT, RO, SK, SL, FI, SV)

 In forceELI: <http://data.europa.eu/eli/reg/2023/2842/oj>

Regarding all fishing vessels, including <12m LOA, MS must

- track them and receive position data from them at regular intervals.
- receive their fishing logbooks, submitted by electronic means

COM must

- develop a software solution to provide for these new reporting requirements, after MS request.

The Control Regulation and the future Implementing Regulation

- [...]
- Control of fisheries:
 - VMS (time lapse TBD)
 - Fishing logbook => => => => =>
 - Landing declaration
 - Weighing
 - Sales notes

ANNEX XV (ex X) |

INSTRUCTIONS CONCERNING THE FISHING LOGBOOK, LANDING DECLARATION, AND TRANSHIPMENT DECLARATION

The following minimum information on the vessels' fishing activities shall be recorded in the fishing logbook and other catch documentation, as applicable, in accordance with Articles 14, 17, 19a, 21, and 23 of the Control Regulation and Title VII, Chapter II of this Regulation, without prejudice to any additional requirements set under the rules of the common fisheries policy or by the , national authorities of a Member State or third country.

Where the Control Regulation does not require the master or their representative to record and report this information, the competent authorities of the Member State may, where appropriate, supplement the available data.

Data element	Mandatory (M), Optional (O) and CIF (Compulsory if applicable)	Description and/or timing of information to be recorded
Unique identification number	M	A unique identification of the activity report.
Vessel identification		In case of pair fishing operations, the same information for the second fishing vessel shall also be recorded.
1. CFR number 2. Internal registration number (IR)	CIF CIF	CFR, when required by Commission Implementing Regulation (EU) 2017/218. For any other vessels, a unique national registration number must be provided instead.
3. UVI	CIF	The IMO number, where the vessel has such an identifier.
4. IRCS	CIF	International radio call sign, where the vessel has such an identifier.
5. Name of the vessel	CIF	The name of the vessel, where

Control Regulation: Exemptions for SSF

- Reporting per fishing trip (vs. per fishing operation).
- No prior notification of arrival to port.
- No need to notify the departure
- Fishing logbook sent after the last fishing operation and before landing
- (...)

Which data will be sent through the app?

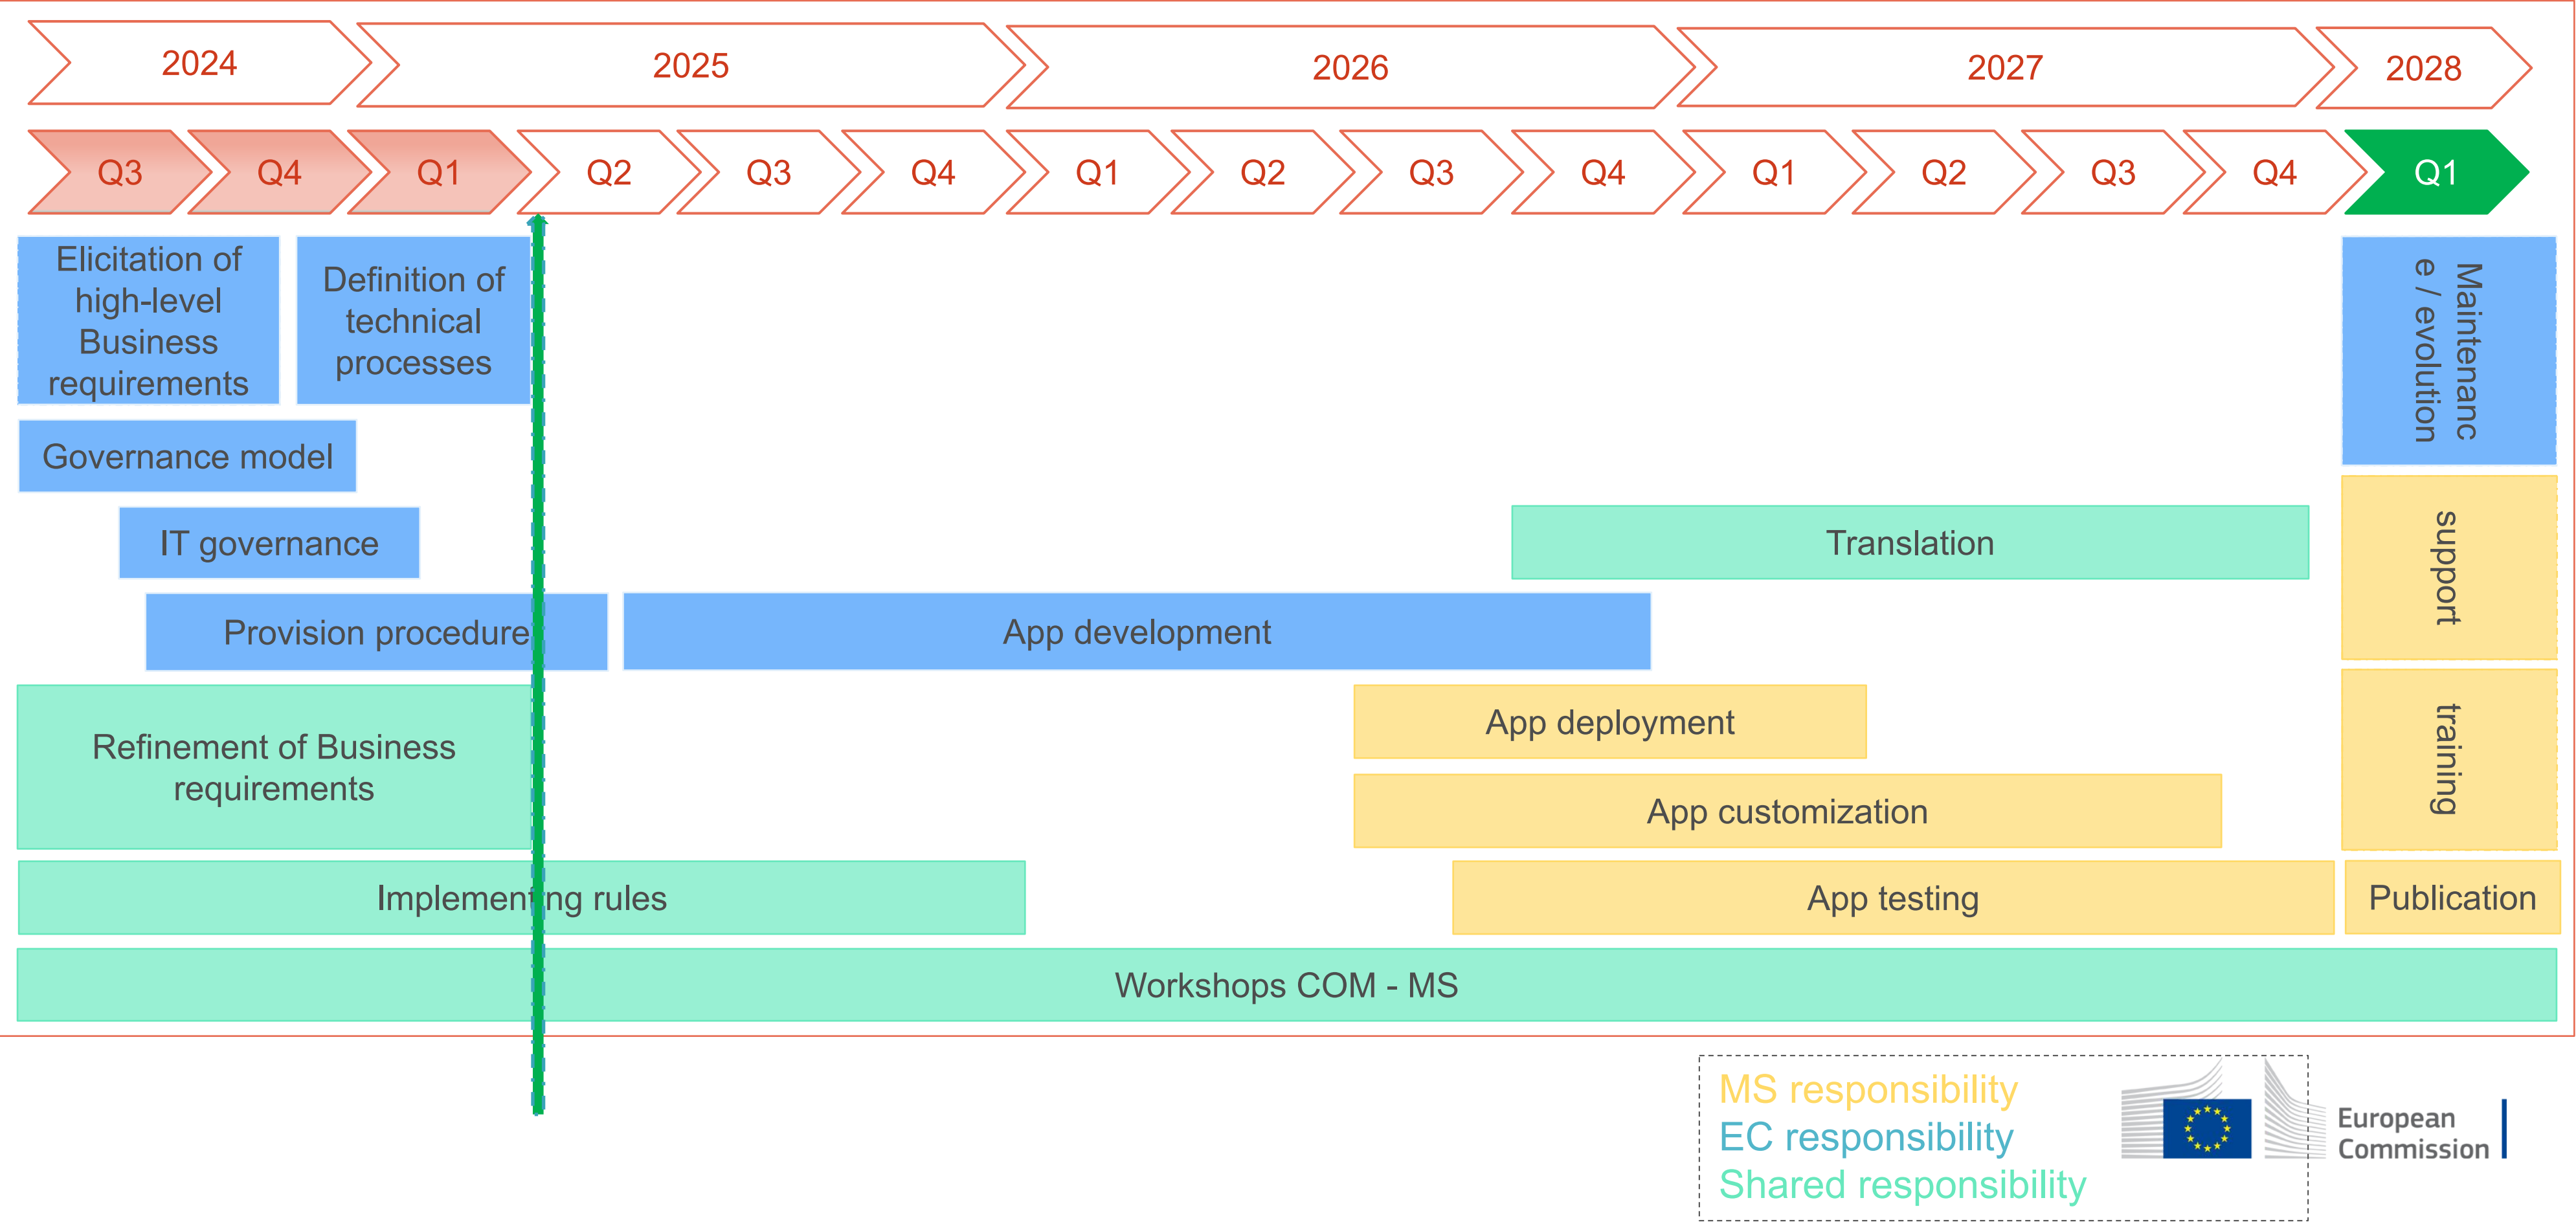

Objective: easy to use app

- Option for storing data when out of network coverage.
- Try to make the interface as fisher-friendly as possible
 - big buttons
 - simple questions
- Training sessions to MS (=> fishers associations) => fishers.
- Free of cost for both MS and end users

Planning: Roadmap and timeline

Thank you
